T625 TDR

high specification cable fault locator

- The T625 is Bicotest's most advanced TDR cable tester. With a range of 0 to 20 kilometres - it out-performs any other TDR.
- Suitable for any type of metallic cable, including AC live in conjunction with a T600 AC blocking filter
- Superb long distance and short range fault-finding capability is achieved with a 20 V output signal, with pulse width automatically adjusted to suit the selected range.
- Accurate to 0.5 metres in short range mode.
- Dynamic range exceeds anything similar. Fault identification is crystal clear - even at the 20 kilometre limit of its operating range.
- Large, uncluttered full-screen trace display for clarity.
- Eight test modes give fast fault location whether testing a single pair or comparing two pairs, one pair against any of the twelve memories, or crosstalk between two pairs.
- The T625 can measure in metres, feet or time. Dielectric can be set using propagation velocity, cable velocity or cable velocity over 2, (V/2). On-board cable library assists fast, efficient selection.
- Fast function configuration. Dedicated keys for Cursor, Dielectric, Range, Trace Position, Pulse
- Amplitude and other most frequently used functions.
- HELP facility provides explanation of controls, contains sample waveforms and allows instrument to be programmed for most common cable types, giving real help to both inexperienced and expert users.
- PC compatibility, via X600 TRACEability Software System, ensures waveforms can be analysed, stored and reloaded to the TDR for on-site, dynamic comparison of the waveforms.
- Bicotest instruments are the ultimate in durability, essential in a true field-portable instrument. Bicotest is the industry standard, proven over 50 years. Comprehensive features and functions, including the high-impact-resistant screen, are tested to destruction. Fit for purpose in any climatic condition, the T625 is supplied in a Bicotest-tough, all-weather shoulder bag.
