A New Way of Testing

Trend Multipro is a valuable tool for effective service qualification and troubleshooting. It ensures correct end-to-end operation of converged networks by testing the service performance as it is experienced by the customer. Provider networks, customer equipment, as well as media coding and transport are all thoroughly analysed and tested.

The Quality of Service test uses benchmark parameters to display either detailed results or a simple Pass/Fail indication.

- Emulation and monitoring modes
- Quality of Experience tests
- Simple Pass / Fail tests

TrendMultipro

Increased Productivity

Rugged Tester for Field Use

Trend Multipro is designed to be carried by field technicians who work under extreme conditions.

The tester is battery-operated and has a well-protected, rugged design.

Excellent connectivity:
2 x USB, Ethernet,
CF, RS-232

*Don't waste time with faulty lines.
Plug Trend Multipro in and start
testing to know in advance how
the service will work.*

Installation and Troubleshooting

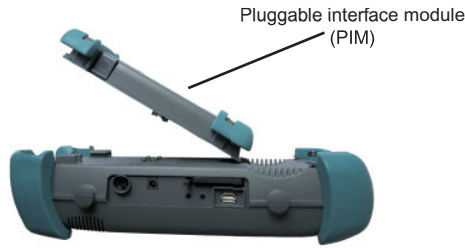

Trend Multipro is the ideal solution for deployment and bringing into service converged networks.

You do not need any extra tools to make measurements. Just connect the tester and let it analyse and report possible problems even *before* they affect the service.

Trend Multipro is also useful for maintenance and troubleshooting tasks, as it can operate in a through mode in order to monitor network operation.

- Automatic measurements
- Contextual on-screen help
- Intuitive and easy to use
- Remote control via PC
- Unlimited storage and exportable results

Modular Multifunction test platform

- Portable and rugged
- Modular and multitechnology
- USB, Ethernet, CF, RS-232 and WiFi connectivity
- High-resolution touch screen

Versatile Multitechnology

No matter if the physical interface is electrical or optical, the Trend Multipro has a modular design supporting a large number of different network interfaces.

Thanks to its modular approach, the Trend Multipro will never date, as new modules can be added to match emerging technologies.

User-selectable setup files enable technicians to choose the correct networking stack, protocols and configuration values for every possible deployment solution.

Trend Multipro modularity

- Protected space for the USB port
- Easy-to-replace Li-Ion battery
- More than 6 h of operation time
- Multi-interface support via pluggable interface modules
- Customised network stacks

Comprehensive and Easy to Use

Trend Multipro's graphical user interface is based on a high-resolution 5.7" true-colour touch screen.

Simple setup and intuitive result displays make testing easier and reduce training to a minimum.

Thanks to the tester's excellent connectivity, by means of wired and wireless interfaces or a CF card, you can export, import and store configurations and results.

Protected space for the USB port
